

THE FRIENDLY EARTHWORMS

EMAANZPEEKABOO.ORG

FIZZA AND AHMED DISCOVERED EARTHWORMS IN THEIR GARDEN AND
LEARNED HOW THEY IMPROVE SOIL HEALTH. THEY STARTED
COMPOSTING KITCHEN WASTE TO CREATE BETTER SOIL.

THEY READ ABOUT HOW EARTHWORMS BREAK DOWN ORGANIC MATERIAL, IMPROVING SOIL FERTILITY. EXCITED, THEY SET UP A COMPOST BIN AT HOME AND ENCOURAGED THEIR FRIENDS TO DO THE SAME.

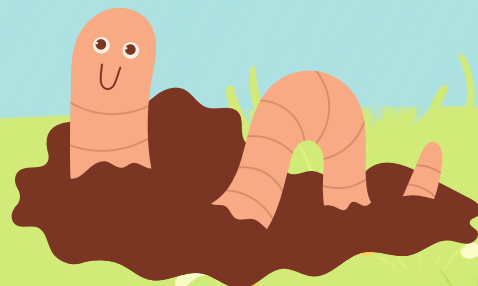

OVER TIME, THEY NOTICED THE SOIL IN THEIR GARDEN BECOMING RICHER AND PLANTS GROWING HEALTHIER. THEY EVEN INTRODUCED COMPOSTING LESSONS AT SCHOOL, WHERE STUDENTS PARTICIPATED IN MAKING COMPOST FOR THEIR VEGETABLE GARDEN.

LESSON

EVEN SMALL CREATURES LIKE
EARTHWORMS PLAY A BIG ROLE IN
MAINTAINING BIODIVERSITY.
