

THE MYSTERIOUS FOOTPRINTS

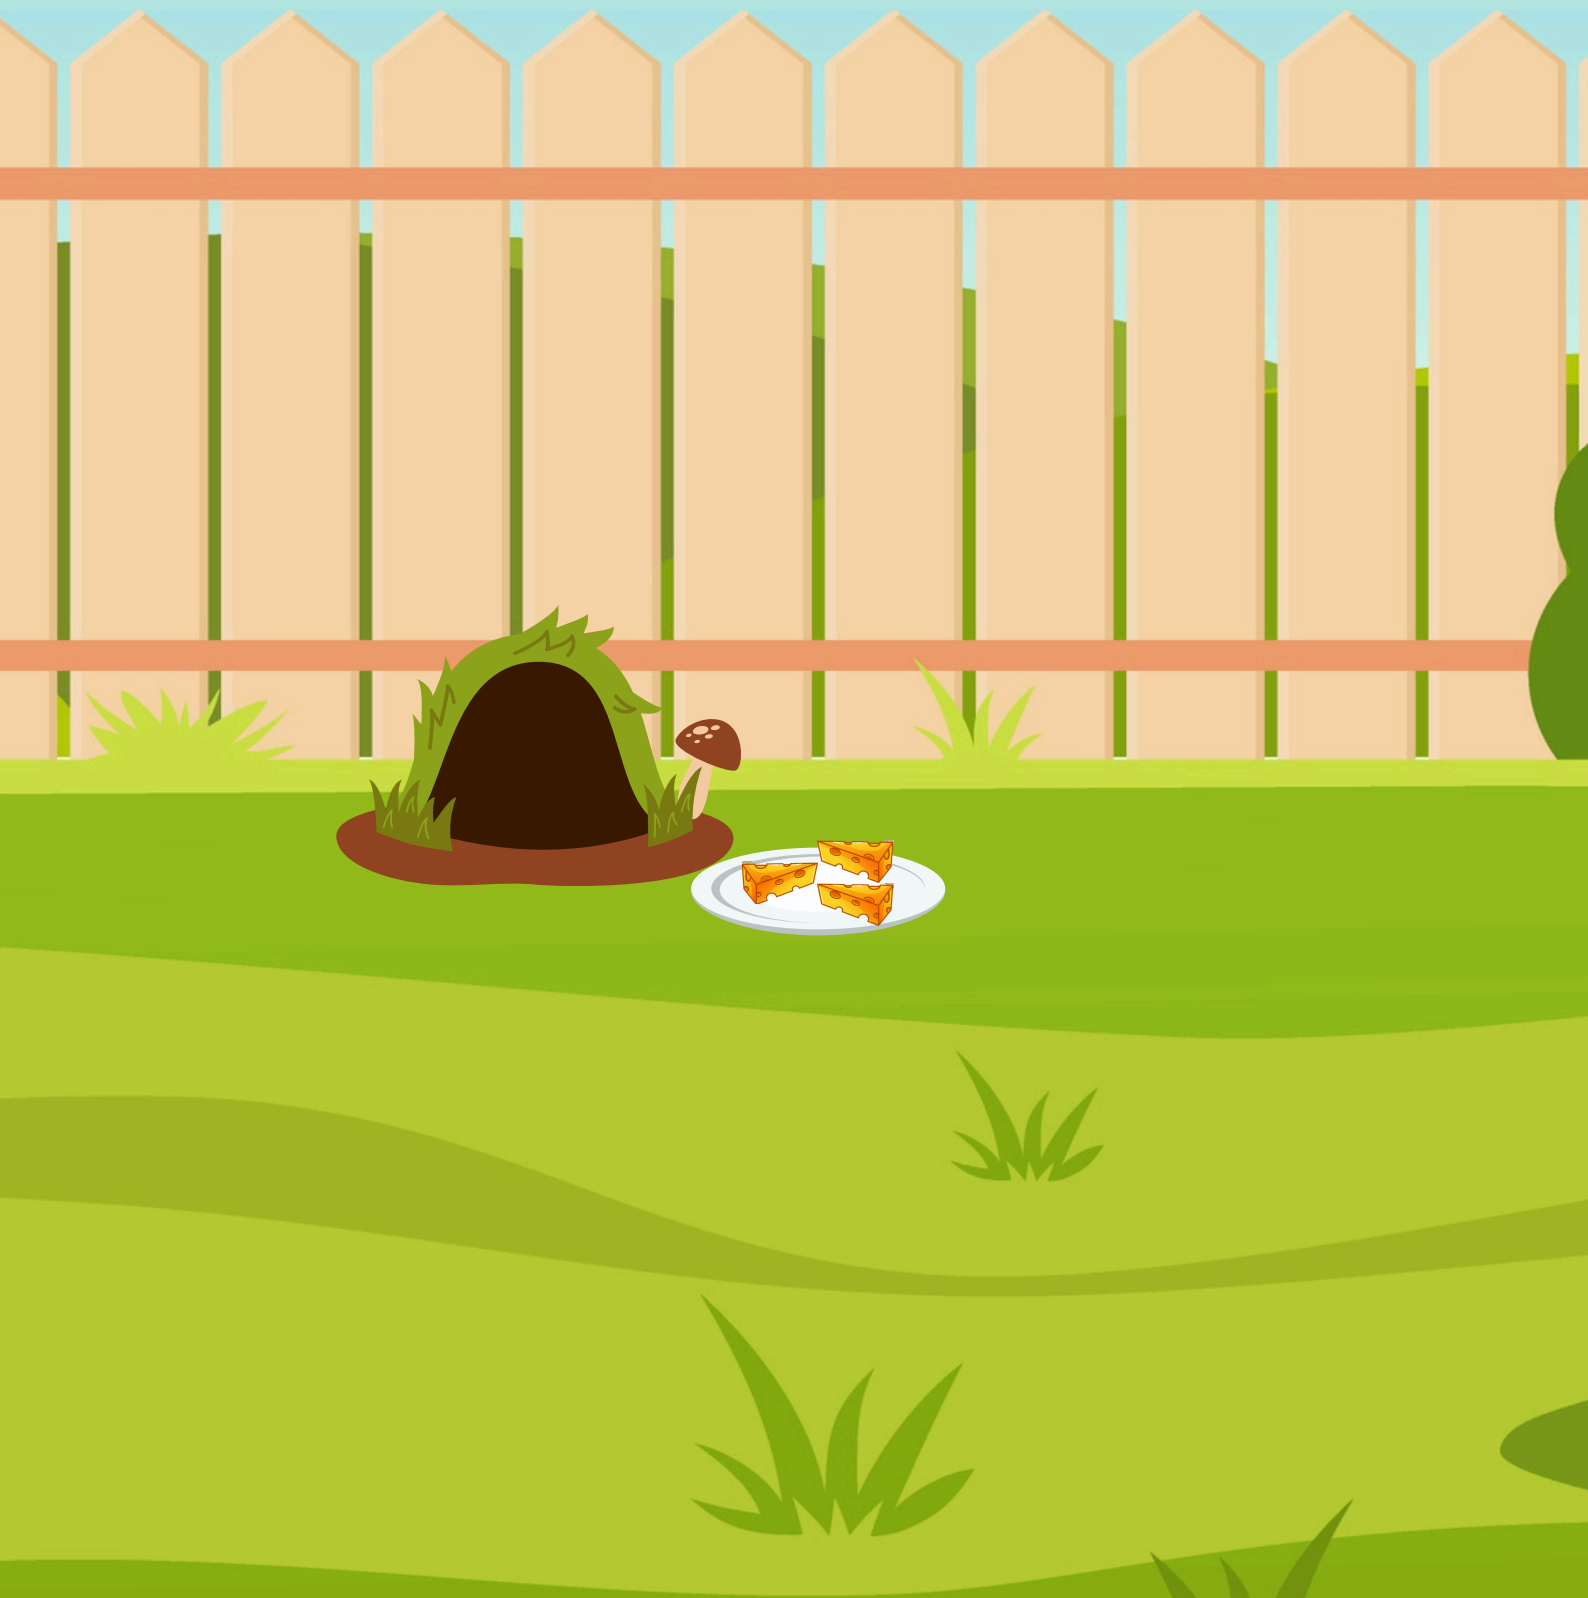

emaanzpeekaboo.org

After a rainy day, Ahmed found unusual footprints in their backyard. With Fizza's help, they identified them as belonging to a hedgehog

They researched ways to make their garden hedgehog-friendly. They learned that hedgehogs need shelter and food sources to thrive, so they built a small hedgehog house using natural materials and left food out

Soon, they spotted the hedgehog visiting regularly. Excited, they shared their experience with their neighbors, who also took steps to create wildlife-friendly spaces.

**Their efforts contributed to a
neighborhood-wide initiative to support
urban wildlife.**

LESSON

**Providing safe spaces for
wildlife helps protect
biodiversity.**
